## GE LED Vintage Style Lamps

GE LED Vintage Style lamps combine the retro look of antique incandescent lamps with the benefits of LED. A warm, candlelight glow is provided by the LED filament, and the golden-tinted glass gives the lamp a vintage look. The long life and low energy of LED create savings on energy usage and maintenance costs versus incandescent.

Common applications include pendants, sconces, chandeliers and other decorative fixtures. Perfect for creating an inviting atmosphere in restaurants and hotels, as well as adding vintage accents in retail and office locations.

### LOW COST OPERATION

- For example, using only 5 watts of energy, saves over \$57 in energy costs over the rated life of a lamp versus a standard 40 watt incandescent lamp based on \$0.11 per kWh. Provides similar light output (450 vs 480 lumens).
- Energy efficiency and long life mean fewer lamp replacements versus standard incandescent or halogen light sources

### EXCELLENT COLOR RENDERING

- Available with a CRI of 80

### COLOR TEMPERATURE

- Available in 2500K

### LONG LIFE

- Up to 15,000 hours rated life (L70)

### DIMMABLE

- Dims from 100% to as low as 20%

### ENVIRONMENTALLY CONSCIOUS

- These lamps are energy efficient, contain no lead or mercury, and are compliant with material restriction requirements of RoHS

### GE QUALITY AND RELIABILITY

- 3-year limited warranty

Information provided is subject to change without notice. Please verify all details with GE. All values are design or typical values when measured under laboratory conditions, and GE makes no warranty or guarantee, expressed or implied, that such performance will be obtained under end-use conditions.

\* The life rating is based on the hours of operation the lamp will provide before reaching 70% of its original rating (L70)  
 \*\* Minimum order quantity = 6

ENERGY STAR® status: ENERGY STAR® certified. Lamps without a "★" are not ENERGY STAR® certified.

# UL 1993 Environmental Requirements for LED LAMPS

Location, damp – Exterior or interior location that is normally or periodically subject to condensation of moisture in, on, or adjacent to, electrical equipment, and includes partially protected locations.

Location, dry – Location not normally subject to dampness, may include a location subject to temporary dampness, i.e., building under construction, provided ventilation is adequate to prevent an accumulation of moisture.

Location, wet – Location in which water or other liquid can drip, splash, or flow on or against electrical equipment.

Notes: 1) Product descriptions ending in "/TP" indicate a carded blister or clamshell package nested in a tray for shelf display. Cards also designed for hook display.

Product is compliant with material restriction requirements of RoHS
