Wireless Sensor Adapter (WSA10)

Daintree Wireless Solution

The Wireless Sensor Adapter (WSA10) is part of the Daintree product portfolio, an open networked wireless controls solution for lighting and building control, monitoring, and optimization. Daintree controls provide a highly scalable solution to address evolving environmental regulations and transform spaces into intelligent environments for buildings of all sizes.

Consisting of three components, Daintree includes sensors and controls at the edge, an open API cloud platform, and software apps to help facility managers make decisions based on how space and assets are actually being used using a data-rich sensor network. Benefits of adding wireless Daintree controls include:

- Up to 50% Energy savings across lighting, HVAC, plugload, fans and more
- Visibility into energy usage, trends and insights to optimize operations
- Automated demand response, superior comfort and lower maintenance expense

Daintree Wireless Solutions Product Overview

The WSA10 is a control component within Daintree – the industry’s leading wireless controls solution for smart buildings, delivering dramatic energy savings and operational efficiency improvements in a simpler, more cost-effective way than ever before. The WSA10 enables open, standards based ZigBee wireless control communications with a variety of sensor devices used in HVAC systems.

The WSA10 provides up to four (4) thermistor temperature sensor inputs, and up to two (2) 0-10V analog inputs suitable for a broad range of transducers, enabling wireless control and management of wired end-devices within the ControlScope system.

- Cost-effective wireless sensor monitoring throughout the facility.
- Eliminate extensive wiring back to the thermostat controller or packaged unit.
- Continuous temperature logging with battery operation in the event of a facility power outage.
