

LEL Handling Instructions

Best Practices to Assure Quality

 This is NOT a replacement to the product installation guide. Read product manufacturer's installation guide before attempting to install this product. Failure to do so may result in serious injury or death.

WARNING

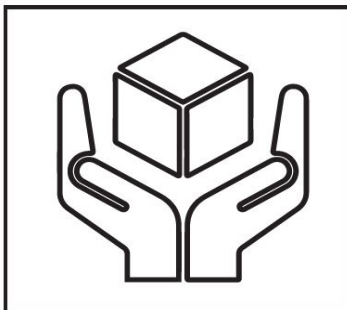

RISK OF FALL:

- Do not install damaged or compromised product
- Follow installation instruction

Note:

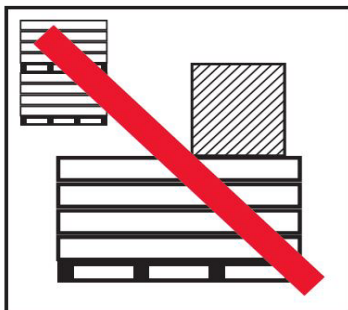

To ensure that all product is in working and aesthetic condition, product shall be maintained in original packaging, in an environment protected from contact with water, dramatic change in humidity, or dramatic change in temperature. Do not remove product from packaging, including the pallets, until product is ready to be installed by a trained professional.

General Care

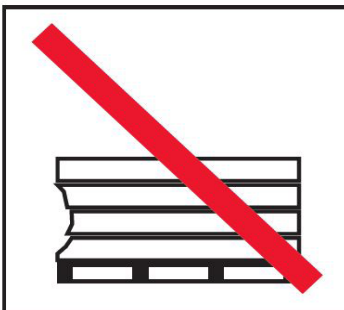

Handle carefully

Rough handling may result in the misalignment of features or damage to the edgelit optic. This may compromise both the performance and aesthetics of the product.

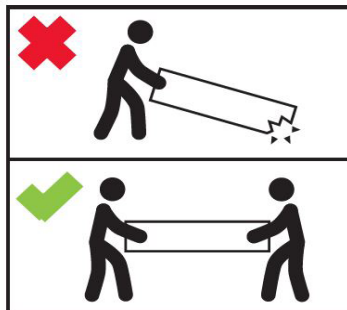

Do not stack other goods on pallets

The packaging was not designed to support unrelated goods. Do not double-stack pallets.

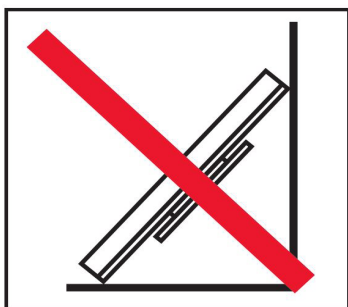

Do not allow impact to the side of the pallet or individual product

This may cause damage to the open or unopened product.

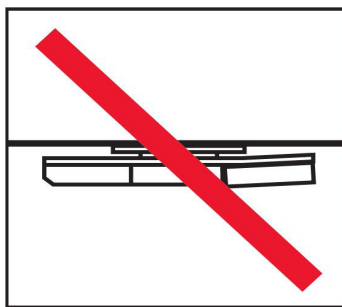

Do not drop boxes

2 individuals may be necessary to securely lift and move the individual packaging. Do not use additional tools or machinery.

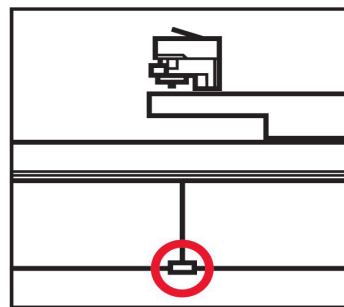

Do not lean, store vertically, or stand product on end

Improper storage will result in damage to the fixture. Be sure to protect the ends of the fixture from damage.

Do not install damaged product

Contact your local representative if you require additional product to finish a site installation.

Once product is installed, ensure the light guide clips are in place

Make sure that the light guide clips are in proper location and orientation after removing the protective film from the light guide.
