1000W GE LED replacement lamps for HID-Ballast Bypass (Type B)

GE’s LED replacement for HID lamps leverage the low energy and long life of LED. The existing fixture is wired to bypass the ballast, which reduces energy use and eliminates the need to check ballast compatibility. Additional maintenance savings are realized by removing costs associated with purchasing and installing ballasts.

**LOW-COST OPERATION**
- Uses 60-75% less energy, providing similar light output
- For example, an LED lamp using 450 watts, saves $3,437 in energy costs over the rated life of the lamp vs. a standard 1,075 watt HID lamp system (1000W lamp and 75W ballast) based on $0.11 per kWh
- Ballast bypass (Type B) wiring eliminates costs associated with replacing ballasts
- Total system >144 LPW

**VERSATILE UPDATE**
- Omni-directional lamp utilizes existing fixture optics
- Flexible use—one lamp can be used in many types of fixtures
  - Universal burn
  - Designed to match HID ANSI profile
- Rated for open and enclosed fixtures
- Temperature rating for -20°C to 50°C
- Exceeding temperature ratings will shorten life of lamp
- Type B eliminates the need to check ballast compatibility

**LONG LIFE**
- 3.3X Longer Life
  - 50,000 hr LED (B10) vs. 15,000 hr Metal Halide (B50)
- 50,000 hour rated life (L70)
- High-Performance fan ensures rated lamp life

**COLOR RENDERING**
- Available with a CRI of 70

**COLOR TEMPERATURE**
- Available in 4000K and 5000K
- Instant On/Brightness

**ENVIRONMENTALLY CONSCIOUS**
- These lamps are energy efficient and are compliant with material restriction requirements of RoHS

**GE QUALITY AND RELIABILITY**
- 5-year limited warranty
- Tether, support kit, and in-line fuse included
- Robust construction with metal components
- Driver with internal fuse provides 6 kV surge protection

*Based on energy rates at .11kwh over the life of the lamp

---

Energy Savings switching from HID to LED Type B

Information provided is subject to change without notice. Please verify all details with GE. All values are design or typical values when measured under laboratory conditions, and GE makes no warranty or guarantee, expressed or implied, that such performance will be obtained under end-use conditions.

* The life rating is based on the hours of operation the lamp will provide before reaching 70% of its original rating (L70)
** Minimum order quantity = 1
# UL 1993 Environmental Requirements for LED LAMPS
Location, dry - Exterior or interior location that is not normally or periodically subject to condensation of moisture in, on, or adjacent to, electrical equipment, and includes partially protected locations.
Location, wet - Location in which water or other liquid can drip, splash, or flow on or against electrical equipment.
Location, damp - Exterior or interior location that is normally or periodically subject to condensation of moisture in, on, or adjacent to, electrical equipment, and includes partially protected locations.
Location, wet - Location in which water or other liquid can drip, splash, or flow on or against electrical equipment.
* Not suitable for air-tight explosive or hazardous fixtures.
