With **Current’s UL Type B** Double Ended Ballast Bypass LED Tubes, **Greater Safety** is Part of the **Design**

Advanced GE Engineering provides the **only** Type B Double-Ended LED System with **THREE** safety features.

- **In-line Fuse Kit**
  - Protects against future re-lamp misapplications after fixture is rewired for Type B tubes.

- **Internal Safety Switch**
  - Prevents current from flowing until both ends of LED tube are engaged with sockets.

- **Internal Thermal Fuse**
  - NEW!
  - GE proudly introduces an integrated feature to mitigate risk of Type B tube installation before fixture is rewired.

**Protects the Installer**

**Protects the End User**
